

ENABLING OPEN IMAGERY ACCESS AND USE

Open Aerial Map

Openness

Fully free and open source.

Access

Easy download and access of imagery

All remote mapping and spatial analysis starts with good aerial imagery. Finding **open high quality imagery** to use is a common global barrier that OAM aims to address.

Inclusive

Drone to satellite imagery available

Collaboration

Any individual or entity can share imagery

OAM is an open service that provides access to a **commons of openly licensed imagery** and map layer services. OAM allows anyone, from drone pilots to satellite companies to contribute their imagery and make it available with an open license.
